SUBJECT INDEX

accommodation
  astigmatic eyes, 73
  in Chinese, 199, 431
  chromatic cues, 244
  continuous measurement, 191
  microfluctuations, 258
  in myopia, 366
  proximally-induced, 151, 239
  pupil responses, 253
  tonic, 266, 366
  and vergence, 239
  during visual tasks, 285
ageing
  intraocular pressure, 357
  stereoacuity, 138
  vergence, 313
  see also presbyopia
amblyopia, 73, 350
angle alpha, 303
aniseikonia, 205
artists' eye disorders, 82, 332, 430
asthenopia, 175, 253
astigmatic lenses, 309
astigmatism, 73
  retinal, 303
autorefractors, 129, 191, 432
bifocal contact lenses, 143, 186
cataracts, 115
children
  amblyopia, 73, 350
  colour vision screening, 344
  myopia, 316
  reading difficulties, 175
  stereoacuity, 350
  tonometry, 219
  visual acuity tests, 400
Chinese
  accommodation, 199, 431
  contact lenses, 100
  myopia, 316
  tear break-up time, 233
chromatic aberration, 186, 244
close circuit televisions, 95
colour vision defects, acquired, 56, 155
colour vision tests, 35, 344
colour vision thresholds, 56, 155, 299
contact lenses
  bifocal, 143, 186
  computerized fitting, 100
  funduscopic, 320
contrast sensitivity changes
  bifocal contact lenses, 143
  cataracts, 115
  filters, 124, 179
  low vision aids, 9
  retinal degeneration, 124
corneal power in emmetropia, 397
corneal topography, 68, 100, 377
crystalline lens
  in emmetropia, 397
  isogyre formation, 91, 209, 212
  thickness measurement, 291
cylindrical lenses, 309
dark adaptation, 155
Diffrax contact lenses, 186
disability glare, 115, 371
disparity and vergence, 48, 239
dyslexia, 175
emmetropia models, 41, 397
endothelium, 305
eye movements
  with astigmatic lenses, 309
  vergence 48, 239, 313
filters
  contrast sensitivity changes 124, 179
  glare disability 371
  visual improvement with 124, 175
fixation disparity 27, 239, 295
flicker, 183, 299
focimetry, 322
funduscopic contact lenses, 320
glare disability, 115, 371
Glasgow Acuity Cards, 400
glaucoma
  colour vision, 56
  optic disc appearance, 383
  effects of sleep, 357
glaucoma screening, 227
Haidinger's brushes, 392
head-mounted displays, 387
Humphrey Field Analyzer, 405
Humphrey Lens Analyzer, 322
hyper-vision, 422
intraocular lenses, 205, 216
intraocular pressure
  children, 219
  glaucoma screening, 227
  after sleep, 357
isogyres, 91, 209, 212
keratoconus, 377
keratometry, 100 *see also* corneal topography
lens implants, 205, 216
lenses *see* contact lenses; spectacle lenses
letter charts, 17, 115, 400
line-spread function, 73
liquid crystal lenses, 427
low-contrast letter charts, 17, 115
low vision aids, 9, 95, 124
magnifiers, 9, 95
migraine, 175
modelling
  colour vision defects, 155
  cornea, 68, 377
  refractive state, 41, 397
modulation transfer function, 73
monkeys
  acquired colour vision defects, 56, 155
  glaucoma, 56
multifocal lenses, 97, 322
myopia
  accommodation in, 366
  age of onset, 366
  heredity, 316
